sizzle.ogg	Public domain	Any	None
tap.ogg	Public domain	Any	None
ding.ogg	Public domain	Any	None
Minecraft Font	Public domain	Any	None

The third party libraries used are box2d, box2dlights, ashley, gdx-ai and libgdx. Since all these libraries and assets are freely modifiable and distributable they are suitable for this project.

Incomplete Requirements

Though care was taken to meet the product brief and requirements that were given at the start of development, there were still some changes due to decisions we made as we continued throughout the games development and design:

- FR_PREP_FAIL was not fully implemented, the player must be careful not to leave the food without completing the preparation/cooking steps as they will not automatically be ready to serve without user input. If left too long, the player will run out of reputation points and fail the game. Therefore food does not become inedible in the game, rather the game ends.
